Radio Frequency Propagation Validation
Jose Monterroso
Status Update 8

This past week I spent most of my time preparing myself with the necessary figures and plots to use in my final draft of the final report. This included terrain analysis google map images, Plots with linear regression lines of the SPLAT! and Shout, images of the POWDER map, and POWDER nodes, as well as example SPLAT! files and JSON orchestrator command files.

Finally, I spent the other half laying out my final draft and deciding which section should go where. As this is the last progress report, I would like to mention that I enjoyed my project when it came to running measurements, and creating plots. But dreaded the activity of writing my thoughts and ideas on paper as I found it difficult to connect my plots of with words without having to explicitly mention what dot on the plot I was referencing.
